

Dr. Qingsong Xiao Ph.D, L.Ac.

The Great Wall Chinese Medicine (GWCM) encourages a happy and healthy lifestyle by providing the finest care to every patient through comprehensive Traditional Chinese Medicine (TCM).

Clients that tend to experience the greatest success with TCM are those that are open to and desire complementary and alternative medicine treatments.

GWCM uses non-invasive diagnostic techniques, including meridians, trigger points, tongue reading, and pulse pattern recognition to make accurate TCM diagnoses. The clinic utilizes non-surgical, holistic treatments to enhance the body's natural ability to heal and maintain itself. GWCM offers holistic treatments for issues that are difficult to diagnose and treat by conventional medicine.

GWCM currently has an excellent team consisting of experienced licensed Acupuncturists, well-trained therapists and staff members who understand both Chinese and American cultures. Patient age range from nine months old to over ninety years old. Many patients have complicated conditions and are referred from other clinics. Patients have traveled from all over the United States and internationally seeking GWCM's expertise.

Explaining how the practice got its name, GWCM founder TCM Dr. Xiao states, "The Great Wall of China is a symbol of the ancient strength, determination, and knowledge of my ancestors and those who came before me. Their incredible work discovering and teaching TCM inspires me to bring that knowledge to others."
